

Data Visualization with R

R Markdown tutorial

Ariane Ducellier

University of Washington - Fall 2025

Installing R and RStudio

Install the latest version of R from the CRAN website:
<https://cran.r-project.org/>

Install the latest version of RStudio from
<https://posit.co/download/rstudio-desktop/>

Open RStudio and go to File > New File > R Markdown

RStudio interface

The screenshot displays the RStudio interface with the following components:

- Source Editor:** Contains an R Markdown document titled "R Markdown tutorial". The document includes a title, author, date, and output format. It also contains a code chunk for setting up the R environment and a section for the R Markdown tutorial.
- Console:** Shows the R version (4.2.3) and copyright information. It also displays the R license and a message about natural language support.
- Environment:** Shows the Global Environment with a data frame named "mtcars". The data frame has 32 observations and 11 variables.
- Data Input:** A section titled "Data Input" with a description of the `read.table()` function and its usage.

```
1 ---
2 title: "R Markdown tutorial"
3 author: "Ariane Ducellier"
4 date: "8/29/2023"
5 output: pdf_document
6 ---
7
8 ```{r setup, include=FALSE}
9 knitr::opts_chunk$set(echo = TRUE)
10 ---
11
12 ## R Markdown
13
14 This is an R Markdown document. Markdown is a simple formatting syntax for
15 authoring HTML, PDF, and MS Word documents. For more details on using R Markdown
16 see <http://rmarkdown.rstudio.com>.
17
18 When you click the **Knit** button a document will be generated that includes
19 the content of this document and the output of the embedded R code chunks in
20 the output file.
21
22 R Markdown
```

R version 4.2.3 (2023-03-15) -- "Shortstop Beagle"

R: Data Input Find in Topic

read.table(utils) R Documentation

Data Input

Description

Reads a file in table format and creates a data frame from it, with cases corresponding to lines and variables to fields in the file.

Usage

```
read.table(file, header = FALSE, sep = "", quote = "\"",
  dec = ".", numerals = c("allow.loss", "warn.loss", "no.
  row.names, col.names, as.is = !stringsAsFactors,
  na.strings = "NA", colClasses = NA, nrows = -1,
  skip = 0, check.names = TRUE, fill = !blank.lines.skip,
  strip.white = FALSE, blank.lines.skip = TRUE,
  comment.char = "#").
```

Rmd file structure

YAML header:

```
---  
title: "R Markdown tutorial"  
author: "Ariane Ducellier"  
date: "8/29/2023"  
output: pdf_document  
---
```

R code chunks:

```
```{r cars}  
summary(cars)
```
```

Markdown text:

```
## R Markdown
```

```
This is an R Markdown document.
```

Main options for R chunk options

```
““{r chunk_name, options}  
R code  
““
```

- `include = FALSE` - No code and no results printed in the finished file.
- `echo = FALSE` - No code.
- `message = FALSE` - No messages generated by the code.
- `warning = FALSE` - No warnings generated by the code.
- `fig.cap = "..."` - Caption for graphical results.

Basic Markdown syntax

```
_Italic text_  
**Bold text**  
# Header one  
## Header two  
### Header three  
[R Markdown](https://rmarkdown.rstudio.com)  
![RStudio interface](RMarkdown.png)  
> "A quote"  
* List item 1  
* List item 2  
1. Ordered list item 1  
2. Ordered list item 2  
Line 1 followed by two spaces  
Line 2
```

Inline code:

```
Here is the result: 'r result'.
```

Printing tables:

```
```{r ktable, results='asis'}  
library(knitr)
kable(mtcars[1:5], caption="A knitr table")
```
```

More yaml options

Table of contents:

```
output:  
  pdf_document  
  toc: true
```

Dashboards:

```
output:  
  flexdashboard::flex_dashboard:  
    orientation: columns
```
