Libraries

```
library(ggplot2)
library(sf)
```

```
## Linking to GEOS 3.11.0, GDAL 3.5.3, PROJ 9.1.0; sf_use_s2() is TRUE
```

```
library(stars)
```

```
## Loading required package: abind
```

Questions

Read the shape file BGD_adm3_data_re.

Read the csv file r_val and transform it into vector data.

Plot the two data sets together.

Read the raster file SR_LR.

Crop the raster file to a box (x=87-93, y=20-27).

Mask the cropped raster to the vector data.

Plot raster and vector data together.
