Lab 10 - Studying Correlated Variables

Ariane Ducellier

7/22/2023

In this lab, we are going to visualize two highly correlated variables from the loan dataset.

Libraries

Load the necessary libraries.

```
library(ggplot2)
```

Data

Load the data.

```
df <- read.csv("../data/LoanStats.csv")
df <- subset(df, grade=="A")
```

Plot

Complete the cell with the code to make the plot.
